DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-24, drawn to method and system of extraction of sinusoids, classified in class 702, subclass 70.
 - II. Claims 25-40, drawn to an audiometer, classified in class 600, subclass 559.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as any system requiring extraction of nonstationary sinusoids; some example fields of use or systems include: communications, signal analysis and filtering, encryption, nonlinear control systems, circuit analysis, etc. See also the non-patent literature cited by Applicant on 8/30/04 for separate utility. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was not made to Applicant to request an oral election to the above restriction requirement because this restriction is considered complex.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrick J. Assouad whose telephone number is 571-272-2210. The examiner can normally be reached on Tuesday-Friday, 6:30am-5:00pm.
